

A utility for securely storing valuable information such as registration numbers, passwords, bank account details, logon keywords, etc. Each entry can have an attached photo, document or extensive numerical data.

Entries can be organized into many categories, with provision for rapid access, sorting and searching. Entries may be flagged, archived and deleted. Passwords, notes and output capabilities are further password protected. On-line help is provided.

TheVault is supported via our web site and feedback is welcome for further improvements, with free upgrades. The au\$33 registration fee unlocks important functionality, and also allows you to apply your own secure access passwords.
