Fixes

The QuickLINK from Treatments to Problems now navigates correctly.

Changes

Accounts and Consultations now have an additional ((a)) button associated with their notes, at the bottom-right of the note tabs. These buttons allow you to view and review all previous notes in an accumulated format while in browse mode.

Adjusted the import/export of the Tax Coefficients for supporting Wages.
Added more staff and practice information on the printed Pay Slips.

A new pop-up menu now allows you change a Client's current schedule.

The Account entry layout now shows a Client's insurance information., which can be viewed without having to QuickLINK to the Client record.

The Appointments dialog now has a new button which navigates you to a chosen Client record. This is located at the top-right of the dialog window.

A site A.B.N has been added, but each business layout still has its own.

Mobile	Your Mobile
A.B.N.	1234567890

SMS'ing from within ThePractitioner

We recommend that you check out **esendex** <http://www.esendex.com.au/>
Charging goes down to 12 cents per SMS, provides notification of failed delivery, does reverse SMS'ing, free SMS receiving, good MIS reporting.

ThePractitioner - Future Upgrade

We are now coding with the new 4D SQL 12 engine.

If you have not taken advantage of the early-bird upgrade, please note that an upgrade to the 4D SQL 12 package will now be \$198.00 .

All previous versions of our package will go into maintenance mode, although the **PowerPC** version is no longer upgraded or sold. Future changes and upgrades will be made via the new 4D SQL 12 package.

Mac OSX

iPad... 4.9 million were sold in Q1. We are expecting sales of 40+ million, although the number will vary according to production capabilities.

iOS 5

Apple's web site has the worthwhile keynote. CoreImage and XCode dev tools were provided to developers on June 6th.

MacOSX

The new **Lion** (Mac OS 10.7) is now shipping via the App Store for \$29.99.

iPhone 4

The white **iPhone** is finally shipping. Rumors of word phone using a universal SIM are running hot.

The U.S. fall season

iCloud and **iOS5**. This will give us full synchronization between our Macs and all iOS devices. See over.

Apple retail stores

May 19th was the 10th anniversary of Apple's stores. 40 new stores are to be opened in 2011, with 5 in China, where turnover-per-square-foot is significantly greater than other countries.

We are getting a new one in the Brisbane CBD.

AAPL... The NASDAQ rebalancing had fund managers and institutions needing to sell off some of their holdings. A share split would really be beneficial. Apple profits increased 95% in Q2... so watch out for the October sales. Current price \$404.00 but dropped below that due to Debt Ceiling worries. Next target probably around \$440.00

- Go Apple ! -

Macs

20 of July saw upgrades to... Intel's SandyBridge chip, Core i7, and the new Thunderbolt super-fast interface. All Macs now ship with the new MacOSX LION .

MacBook Air A fully functional laptop, solid state and super fast.

MacMini Also upgraded to the above chips and OS.

A fully optioned, new Mac desktop can now be had for under Au \$3,000.00.

Apple's Cloud Service / MobileMe

The new data center will soon be operational in our Spring (US Fall) and supports **iCloud**, a **free** service to automatically sync data from Macs, PCs, and iOS devices. This wireless service includes a notification centre, and there are new versions of Calendar (sharing), Contacts and Mail (sync'd InBox and Folders), App Store, iBooks, Pages, Numbers and Keynote. New AppStore purchases will download to all iOS devices and iBooks bookmarks are sync'd to all iOS devices. Daily backups are automated and updated applications (API's have been provided to developers) now have a **Versions** feature which works similarly to **Time Machine**. **iCloud** offers a \$24.99 p.a. **iTunes Match** for a cost-effective way to upgrade all your music to Apple's 256Kbps / AAC / DRM free format, and have them sync'd to 10 devices.

PhotoStream allows you to capture photos etc on any iOS device, and have them sync to all your other devices. The music and photos sync go to a special folder for 30 days, and this is outside of the 5GB of storage provided to you by **iCloud**. Your **MobileMe** service will be valid to June 2012, and you have until then to migrate to the new **iCloud** service.

Apple iPhone

There are two new phones to be released in September. iOS 5 includes **iMessage**, and provides a simplified/integrated notification centre. It integrates Twitter, and uses Wi-Fi to sync **iTunes** music. A new camera capability allows you to take a picture instantly, without logging in to your phone.

Get **Viber** for the **iPhone** via the AppStore, and you can make free phone calls and send texts to other **Viber** users.

AppleTV

The new model at \$129 is a terrific value. Combine it with a new MacMini for a complete HTPC solution.

App Store (for iPod + iPad) 10 Billion+ downloads for **iOS** Devices, 300,000+ applications.

Newspapers and magazines are now included in a new folder marked **Newsstand**, a new **AppStore** feature.

New additions

Our trekking in New Zealand came across this puzzling rhino.

Until the next issue...
