

PRACTICE POINTS

Our Product • ThePractitioner • Version 12.

Latest package version is 4D SQL 12.4 HotFix1a. (115208).

This build, both single user and server versions, run fine on **Apple's Snow Leopard** and **Lion** operating systems.

4D 13 (Hot Fix 3) has also been released, and comes with a host of example and "how-to" databases.

Fixes

4D have finally fixed a number of problems, including an "On-After-Keystroke" issue.

Changes and Additions

The calculation of GST has now been re-written and includes all of a practice's expense entries. A couple of extra fields have been included to enhance the GST calculations which are now done on its own page, where you can find the relevant BAS codes. Calculator buttons allow you to recalculate your BAs after the event.

Multiple CPT and HCPC records can now be recorded into Treatments.

Provided access to letters via Consultation to make use of template forms, and added assessment tracking and scoring via Consultations.

If can stop excessive printing via Control-Option-Escape.

iPads

The generation 2 and 3 iPads will get SIRI via the iOS 6 update.

iPhones

About 250 million sold to date. Incoming calls now handled with a range of new options. **FaceTime** now via Cellular in addition to Wi-Fi. Calls and messaging can be integrated.

MacBooks

MacBooks and MacBook Airs updated for IvyBridge processor, more / faster SSD, improved graphics, HDMI, USB3, Thunderbolt including adapters for FireWire, Gigabit Ethernet as well as the Mini-DVI.
